# PARTNERSHIP IN COMMON SUCCESS

High quality business relations based on trust and professionalism

We always try to find an optimal solutions for every design challenge of our customers. We are able to provide products according to customer's needs and technical specifications.

**Meet our main key factors of business success:**

- **continuous development** - pursue of new activities and extension of production activity, launching of new factory infrastructures and production lines
- **innovative and eco friendly production technologies**
- **designing and implementing products of modern shapes for sanitary sector**
- **perseverance and flexibility in operating** - ability to maintain the good market position regardless of the changing trends, responsiveness to changes in market trends and capacity to change the production profile depending on demand for products made of plastics.

Our commitment to work, care for customer expectations, full professionalism and many years of experience are the key factors for stable and long term effective business relations.

Creative team of our designers creates concepts of new products.

We want to meet your requirements by embracing new technological solutions and bringing new production lines to life.

# B2B PRODUCT DESIGN CENTER

Design and compose with us an original offer for your brand

Centrum is one of the most active B2B OEM producers for many popular brand companies in sanitary sector. Our product portfolio consists of bathtubs, shower trays and washbasins and sinks of various sizes, designs and functional parameters. Depending on our Customer's needs, we are able to produce small or large product series.

- **a wide range of models and forms to choose**
- **universal and elegant palette of colours and structures**
- **convenient and reliable cooperation**

# SAFE TECHNOLOGY FOR YOUR HOME

## NANO SILVER TECHNOLOGY - innovative microbiological protection

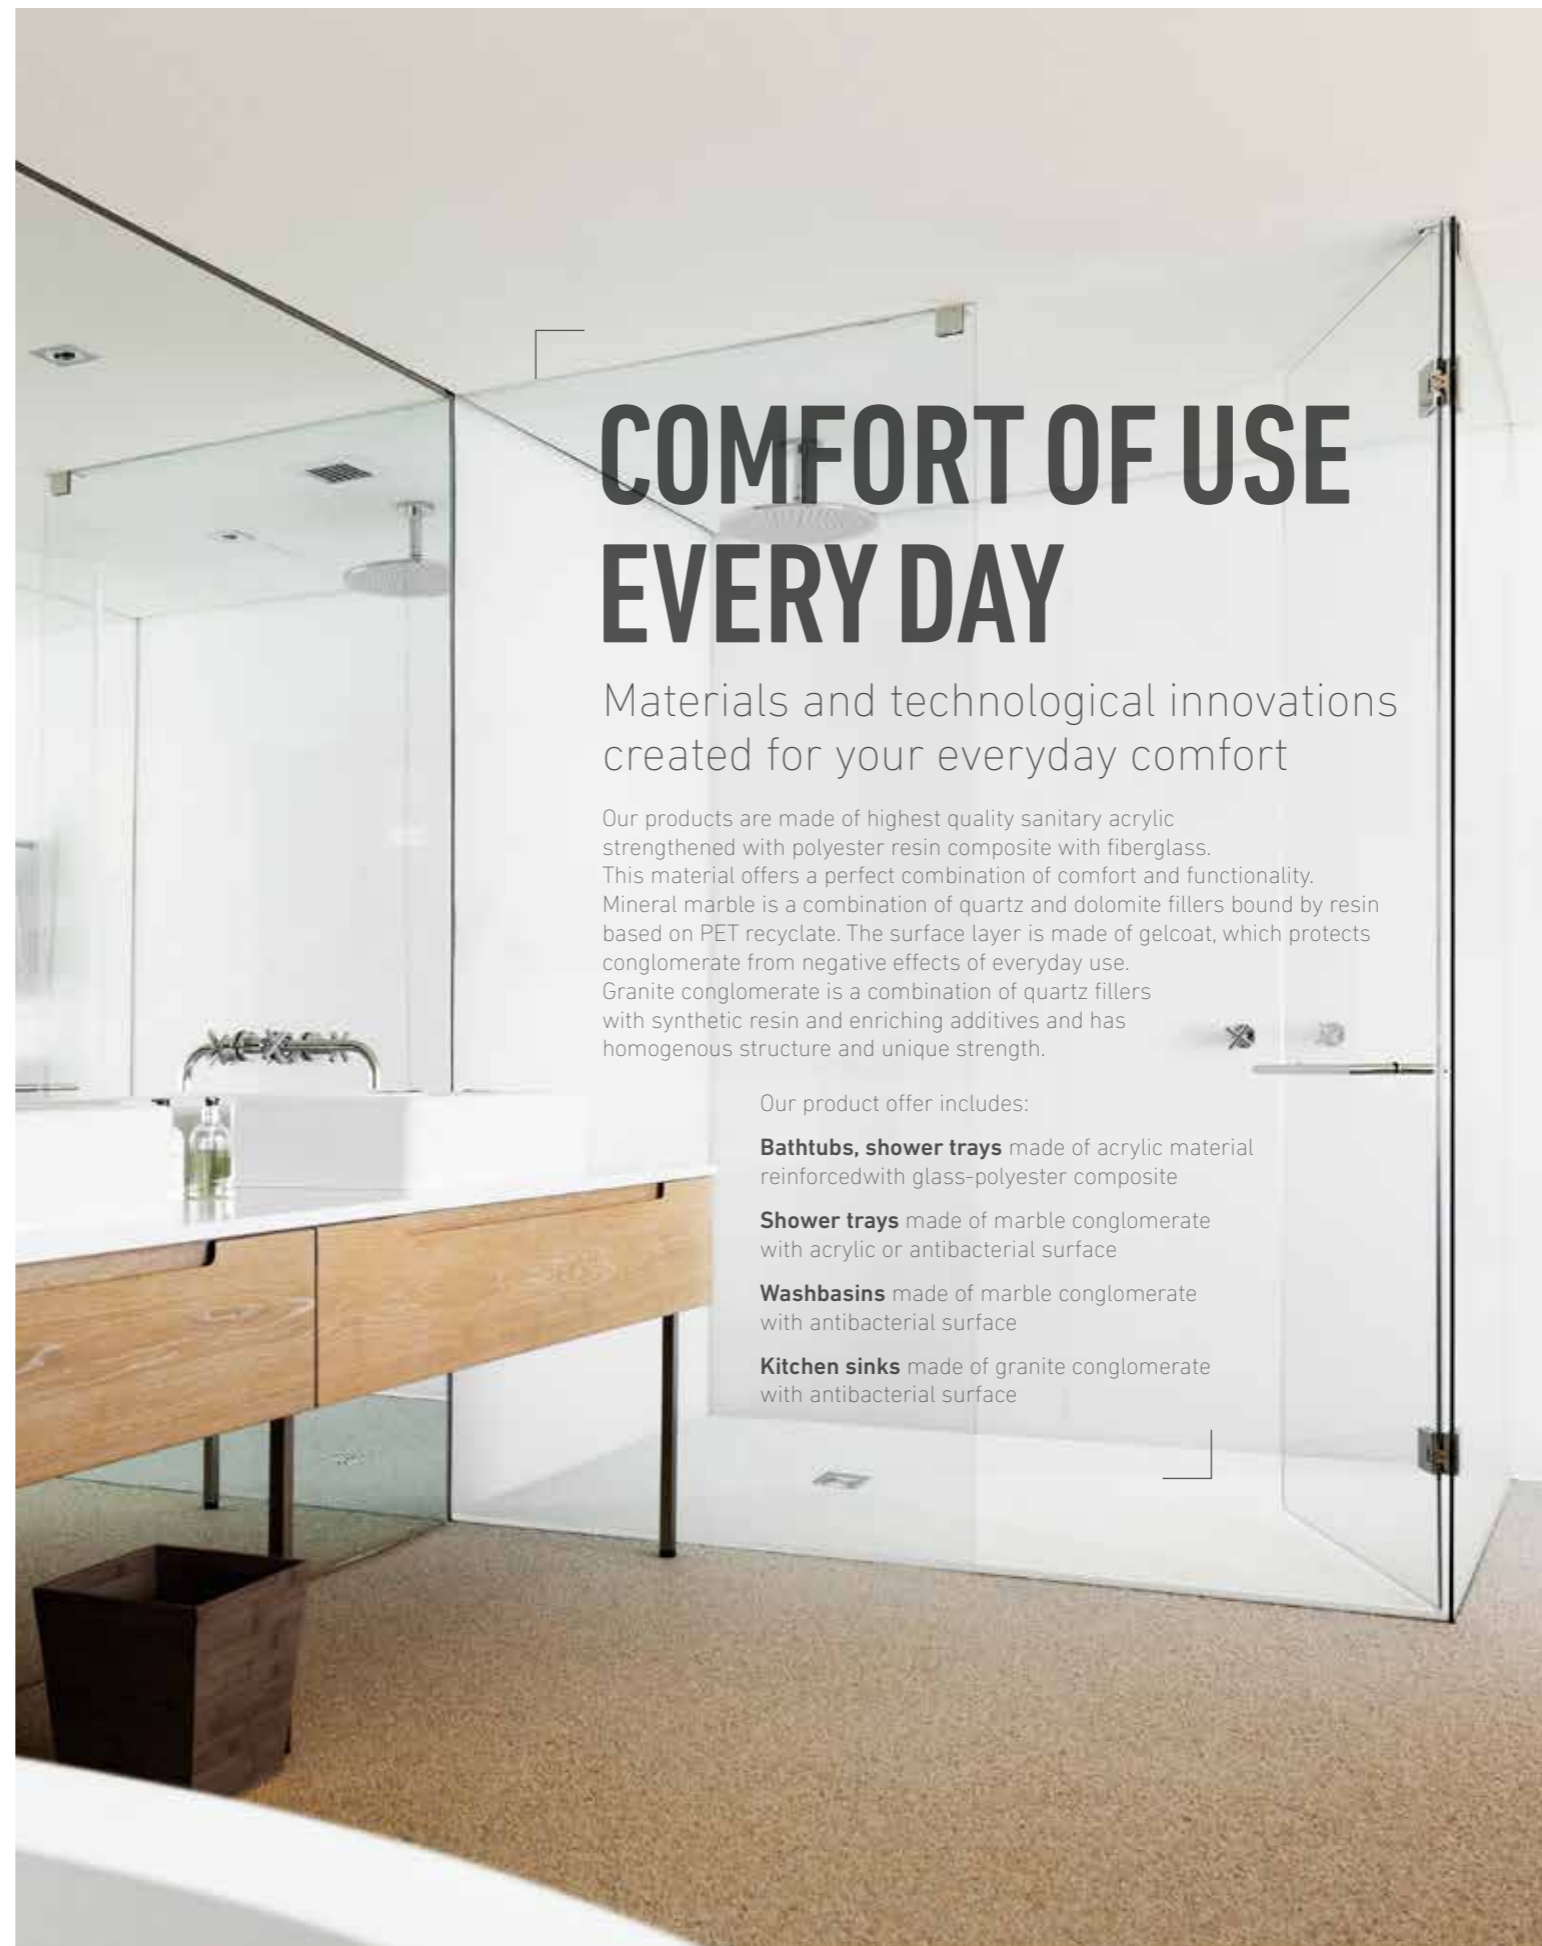

Innovative technology of nanosilver application into ceramics, which was developed and implemented in our company allows to create any collections of sanitary products which are able to self cleaning.  
There is a mystery of reliable quality of our products that sticks in nanoparticles - washbasins, bathtubs and shower trays are protected with antibacterial surface which fight down any bacteria spontaneously and prevent development of them.  
Thanks to that we established new global standard of safety, comfort and hygiene of life.

New line for washbasins production allows to produce 12 000 pieces per month

Quality and properties of products are verified by the factory production control at each production stage, as well as final quality check of each piece of products.

Goods identification thanks to RFID system, as an electronic support to the manufacturing process.

# COMFORT OF USE EVERY DAY

Materials and technological innovations created for your everyday comfort

Our products are made of highest quality sanitary acrylic strengthened with polyester resin composite with fiberglass. This material offers a perfect combination of comfort and functionality. Mineral marble is a combination of quartz and dolomite fillers bound by resin based on PET recycle. The surface layer is made of gelcoat, which protects conglomerate from negative effects of everyday use. Granite conglomerate is a combination of quartz fillers with synthetic resin and enriching additives and has homogenous structure and unique strength.

Our product offer includes:

- Bathtubs, shower trays** made of acrylic material reinforced with glass-polyester composite
- Shower trays** made of marble conglomerate with acrylic or antibacterial surface
- Washbasins** made of marble conglomerate with antibacterial surface
- Kitchen sinks** made of granite conglomerate with antibacterial surface

We put a lot of attention on promotion of premium products signed with own brand VAYER®.

VAYER® is an exceptional native brand with unique technological solutions which clearly improve the comfort of use and which are rarely applied by other manufacturers. We are constantly improving our products' standard and quality by introducing further innovations.

We also offer a wide range of kitchen quartz sinks with unique antimicrobial coating. Our kitchen sinks are created with great care for the tiniest details. We care not only for the selection of the best materials but also for interesting design and colours. In our current offer you will find one- and two-compartment sinks with or without a drainboard as well as undercounter models.
